To Whom-It-May-Concern:

Testimonial for Tan Thien Ai Jessie

Jessie has consistently proven herself to be a dedicated and accomplished student, maintaining excellent academic performance throughout her studies. Her commitment to technological innovation was exemplified through her ingenious microbit-based anti-theft alarm system project, which demonstrated her ability to develop practical security solutions using modern technology. This project showcased her understanding of sensor integration and alert systems, reflecting her readiness for advanced technical studies.

Beyond her academic achievements, Jessie's participation in the computational thinking course and subsequent contest at the Centre for Nurturing Computing Excellence demonstrates her proactive approach to learning and willingness to challenge herself beyond the curriculum. Her confident presentation on home networks and the Internet revealed both her technical knowledge and her ability to articulate complex concepts clearly. With her strong academic foundation and keen interest in technology, Jessie is well-positioned to thrive in her pursuit of an IT education at the polytechnic level. Her dedication to learning and practical approach to problem-solving will undoubtedly contribute to her future success.

I fully support her application and look forward to seeing her grow in her chosen field of study. I can be reached at 6258 9781 should you need further information or clarification. Thank you.

Yours sincerely,

Mr Chin Wei Chiat, Alvis
Computing Teacher
